ATLP **Hijri** Datepicker

based on Angular Material

To use this datepicker simply import
AtlpHijriMatDatepickerModule in your module
and then use the component directly **<atlp-hijri-mat-datepicker>**

Inputs:

- formControlName **OR** [(ngModel)]
- [id]: string
- [name]: stinrg
- [placeholder]: stinrg
- [max]: Date
- [min]: Date
- [required]: boolean

Outputs:

- (dateChange) without any parameters

Example:

```
<app-atlp-hijri-mat-datepicker
  [id]="'sampleDate'"
  [name]="'sampleDate'"
  [(ngModel)]="sampleDate"
  (dateChange)="checkDateChange()"
  [required]="true"
  [max]="maxHijri"
  [min]="minHijri"
>
</app-atlp-hijri-mat-datepicker>
```
